PLANTS and PESTS TO APPLY ON

Plant	Disease	Dosage and Timing
vegetable	root-tumor nematodes(meloidogyne spp.)	5 lt/da, the day the seeds will be faked or 1-2 days before it

Filap 20 EC's effect duers 2-4 months. Besides, no need for another separate combat againts the underground pests on the area applied.

PREPARING FOR APPLYING:

Before the applying, a good soil treatment is essential. The application is made onto the surface after a calibration that enables to use 60-80 liters of water / da by the pulverisator dragged by the tractor. Immediately right after, by soil treatment, or giving sufficient amount of water, it is provided that the chemical reaches to 10-15 cm deep. Since the chemical attaches to the soil rapidly, the application and mixing into the soil must be done the same day.

Shall not be contacted with skin, so back pulverisator shouldn't be used and protective preventions must be taken.

MISCIBILITY:

Because applied as soil spraying, cannot be mixed with other products.
