**The disinfestation of soil and plant:** the first disinfestation is done after plantation. Then, it is repeated on every 14 days when the plant appears on soil. The drug should be provided to pass onto soil by being washed of plant by using the sufficient amount of water.

**The implementation of sap:** the implementation is done as sap in terms of 100 ml product coming for each seedling after the seedlings' misleader and is repeated on 14 days.

**INFORMATION ON RESISTANCE:**

The pesticide name **Parend** is a fungicide classifies as Group 14, F3 in accord with its action mechanism. Repeated applications of pesticides with same action mechanisms invite development of resistance. Therefore, to delay development of resistance, do not exceed the recommended number of **Parend** applications in the same season. In case repeated application is necessary, take care to use pesticides with a different action mechanism (except of Group 14, F3).

**MISCIBILITY:**

It can be applied by mixing with insecticides, fungicides and liquid fertilizers. It should be used immediately after mixing with alkali fertilizers.

**Name & Amount of Active Ingredient:** 50% Tolclofos-methyl  
O-2,6-dichloro-p-tolyl O,O-dimethyl phosphorothioate

GROUP	14, F3	FUNGICIDE
-------	--------	-----------

**SYMPTOMS OF POISONING:**

Irritation on eyes, nose, throat and skin, dizziness and headache, weakness, blurred vision, nausea.

**FIRST AID MEASURES:**

Wash the contaminated body parts with plenty of water and soap. If the pesticide or contaminated seeds are swallowed, induce vomiting. In case of poisoning, call a doctor. Take the package and label of the pesticide with you.

**ANTIDOTE AND NECESSARY INFORMATION:**

There is no special antidote. The treatment is performed as per the symptoms. In the low-level-poisonings, give ATROPIN SULPHATE and 2 PAM.

**NATIONAL TOXIN HOTLINE (UZEM) PHONE: 114**
